Education

National Institute of Technology Silchar

Bachelor of Technology

July 2018 – May 2022

Silchar, Assam

Experience

Glamzy (formerly BuyEazzy)

Software Development Engineer

Apr 2024 – Present

Bengaluru, Karnataka

- Architected **WebView-based hybrid app (Next.js + React Native)** enabling instant deployments without app store/play store delays
- Scaled consumer app to **20K+ MAU** with high-performance UI and seamless navigation
- Built **POS system across 60+ stores** with QR-based SKU tracking improving inventory traceability
- Designed **QR lifecycle tracking (GRN → billing → RTO)** enabling expiry-based optimization
- Developed **ERP with RBAC**, reducing manual effort by **30%**
- Launched **Glamzy TV (reels feature)** boosting engagement and conversions

Cogoport

Software Development Engineer

Feb 2022 – Dec 2023

Gurugram, Haryana

- Built **BL/DO system** reducing invoicing TAT **30→7 days**, driving **10Cr+ revenue**
- Developed **Credit Notes, IGST invoicing, salvage workflows**
- Engineered **Revenue Leakage Detection** system for risk prediction
- Built **Profitability tools** preventing loss-making shipments
- Designed **Audit Trail system** improving financial transparency

Projects

WebView Super App Architecture | *Next.js, React Native*

- Enabled real-time experimentation by removing app store dependency
- Built secure communication between web and native layers

QR Inventory Tracking System

- Implemented unit-level tracking across full supply chain lifecycle
- Enabled fraud detection and inventory optimization

Technical Skills

Languages: JavaScript, TypeScript, C++, Kotlin, Ruby, PostgreSQL

Web: React JS, Next JS, React Native, Ruby on Rails

Systems: Microservices, WebView Architecture, Redis, RabbitMQ

Tools: Docker, Jenkins, Git, Linux, Redux

Leadership & Achievements

- Led development across frontend, ERP, and POS systems impacting business operations
- Mentored engineers and conducted code reviews across teams
- Awarded **CogoCon Thailand Offsite (2022)**
